- Simply adjusts by placing onto the hydrant nut
- Works on pent nut sizes from 1¼" - 1¾"
- Distributes equal force on the nut flats and stays locked under load; transferring the torque to where it is needed
- Corrosion resistant
- Lifetime warranty

BHW-01B-01

Bionic Hydrant Wrench™

The Problem:

With over 100 years of municipal Fire Hydrant installations, many cities must deal with the legacy issues of these various designs.

- Old and aging metal
- Worn hydrant nuts created by using the wrong wrench on corroded or frozen nuts
- Pent nut sizes that range from 1¼" - 1¾"

Existing adjustable hydrant wrenches exist, but they do not fully engage the nuts. They require a hand screwing action to adjust and lock down on to the hydrant nut.

Typical Old Nut

Current Adjustable Wrench Style

Current Adjustable Wrench On Nut

(Place on nut. Turn 7-8 times to reach correct size. Remove work.)

The Solution:

BIONIC HYDRANT WRENCH™

A High Performing Solution When Speed and Function Count the Most

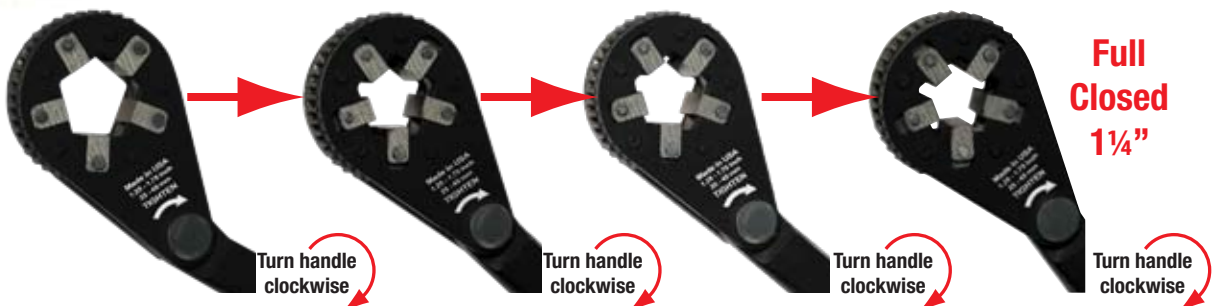

Bionic Hydrant Wrench™ On Nut

(Place on Nut. Adjust handle once. Remove work.)
