**BIONIC GRIP™
FEATURE OVERVIEW**

POWERFUL, SYMMETRICAL GRIP

- Combines the versatility of an adjustable wrench with the simplicity of pliers
- Performs the jobs of several different types of pliers and wrenches
- Open-ended head can access difficult to reach areas not accessible with a closed-headed wrench
- Patented Bionic Gripping™ technology distributes gripping forces over a larger work surface compared to the jaws of conventional pliers
- Interlock™ mechanism converts torque load into an intelligent locking feature
- The multi-jaw grip minimizes distortion under load
- Great for softer materials, such as plastic, copper and brass

VERSATILE AND EASY TO USE

- No tricky knobs or adjustments
- Fully adjustable with a one-handed squeeze
- Efficient ratcheting by releasing, then re-gripping the object
- Together the family of three replaces 35 metric and SAE wrench sizes, As well as pipes and tubes from 5/16 inch to 1 ¼ (outer diameter)
- Instantly grips pipes, fasteners and fittings.

COMFORTABLE FOR MOST SIZES AND ABILITIES

- Incorporates universal design features with enhanced ergonomics
- Fits large and small hands
- Universal orientation -- works in either hand in any position
- Soft, cushioned handles

QUALITY CONSTRUCTION

- Made in America
- Lifetime warrantee
- Hardened, cold-rolled, steel-laminate construction
- Industrial-quality, black-oxide finish resists rust, corrosion and chipping
- Balanced spring action provides optimal control
- QS 9000 certified manufacturing
